## About Me

A passionate web developer with a strong ability to learn and adapt to new technologies. Equipped with solid problem-solving skills and system testing expertise, I have successfully completed multiple projects across various domains. I am continuously seeking opportunities to grow and apply innovative solutions in web development environments.

## Professional Experience

SWISH.global – **Senior Web Analyst**
*August 2025 – Present*
Key responsibilities:
- Developed and maintained dynamic, scalable web applications and internal portals to streamline company operations
- Designed and implemented automation systems and integration solutions that improved internal processes, reduced manual tasks, and supported data-driven decision-making.

Metaconnect Ltd. – **Web Engineer**
*January 2022 – July 2025*
Key responsibilities:
- Developed and maintained multiple web projects, ensuring high performance, responsiveness, and scalability.
- Collaborated with cross-functional teams, translating business requirements into functional web applications.

Efighter Learning Platform – **Web Developer / SEO**
*August 2020 – September 2021*
Key responsibilities:
- Built dynamic and user-friendly web platforms, significantly improving user engagement.
- Led the development of new features and conducted system tests to ensure quality and optimal performance.

W3 Programmers – **Web Designer (Internship)**
*February 2020 – May 2020*
- Assisted in designing and prototyping websites, focusing on responsive design and user experience.
- Participated in client meetings to gather project requirements and provide design solutions.

## Achievements

**Led successful deployment of 30+ web projects** that improved client engagement and business outcomes.

**Contributed to MERN stack projects,** enhancing codebase quality and learning from industry peers.

**IELTS 6(NBLT 5)**

**12+ Extra Certifications**
